## **Student Accident Insurance**

The Board of Education has purchased School-time Blanket Accident Insurance Coverage for district students for all school time activities, including interscholastic sports. This coverage is in excess over any other valid and collectible insurance that a student may have. If there is no other coverage, the program pays on a primary basis up to the limits of the policy. Remember, this insurance provides secondary coverage only.

Parents/ guardians are responsible for requesting information and claim forms by contacting the school. It is imperative that the information and guidelines provided be reviewed and followed regarding timelines for filing claims. School officials will make the information and forms available upon the request but the responsibility of handling claims will be that of the parent / guardian.

Football and summer activities are not covered under school insurance. Players must provide proof of insurance or purchase an insurance policy to cover the football season or summer activities.
