Challenge Program

The Challenge Program is an **outdoor adventure** of progressive self-discovery and group dynamics. Beginning with simple, get - acquainted activities, the trained leader guides participants through trust-building activities, initiative games, and eventually onto the various elements of the low-ropes course.

While involved in the challenge course; participants must function as a group, using various abilities to obtain a pre-arranged goal. Debriefing after each activity, enables your group to relate real-life values from the initiative to situations in life, faith and work. Your team learns to think together, opening up communication and discovering new solutions to old problems.

BUILDING TRUST

Every member of your team is vital. Every person helps make a difference. When your group comes together...

the results are incredible!!
